V6-44-HYBRIDE : The BRM Revolution

It functions by using an automatic rotor which winds up a micro-alternator which then stores the energy by means of a recuperator. This energy is then used to run a quartz motor.

This model therefore proposes two technologies: an automatic functioning for the winding and another for the precision of quartz.

This movement comprises six rubies which enables the axis to rotate in optimal conditions. Fully charged the battery's life is approximately six months.

V6-44-HYBRIDE-BG

Specifications

BTY75 caliber
Brushed stainless steel case
Black dial V6-Hybride
Checkered hands
Black leather strap with holes
Maximum recommended retail price: 1660€
or Black rubber strap
Maximum recommended retail price: 1550€
Warranty: 3 years
