

BRM INNOVATION

## THE RG-46-RACING

ONCE AGAIN, BRM LEADS THE WAY WITH THE FIRST TECHNICAL POLYMER WATCH. DESIGNED BY FRENCH MANUFACTURERS AND TESTED BY PROFESSIONAL ATHLETES, THE RG-46-RACING IS THE WORLD'S LIGHTEST 3-HAND WATCH.

### SPORTING EXCELLENCE

---

At just 47 grams, the **RG-46 RACING** is one of the lightest watches the world has ever seen.

BRM has once again revolutionised the watchmaking industry by using polymer, a material present in many everyday objects and used for industrial purposes.

Polymer is appreciated for its lightness and flexibility and the use of this material results in a watch that is ideal for high-level athletes. The **RG-46 RACING** is designed for movement, speed and absolute comfort. This 3-handed model is the most sporting and the most technical watch on the market.

### BRM EXPERTISE

---

The design: the RG-46 Racing has an exclusive suspended movement with 6 shock absorbers, 3 horizontal and 3 vertical, making it highly resistant to shocks and vibrations. The rotor mounted on two rows of ceramic ball bearings can withstand the shakes and impacts that accompany intense, rapid wrist movements. The patented "auto-stop" feature also allows freedom of movement and means that you can wear this watch to play sports like golf, tennis or other sports involving throwing without altering the automatic movement.

### TECHNICAL INFORMATION

- Casing, lugs and winder in engineered technical polymer
- Sapphire glass on front and back
- Chequered superlight hands
- Special stainless steel screws
- BRM automatic movement
- "Auto-stop" feature and shock absorbers
- Black technical fabric strap with white holes
- Waterproof up to 50 metres
- Weight : approx. 47g

MRP : 8 900 €
